

## Standpipe Piezometer

Simple and economic measurement of groundwater pressures in soil and rock can be carried out using Casagrande type piezometers

# Standpipe Piezometer

## Overview

Simple and economic measurement of groundwater pressures in soil and rock can be carried out using Casagrande type piezometers.

Geosense® piezometers are made up of low air entry porous plastic or ceramic elements which are connected to standpipe tubing and lowered into a predrilled borehole. Alternative types may be driven or pushed into soft soil.

Where Casagrande type piezometers are being installed then the porous element is surrounded by filter sand and a Bentonite seal placed above this response zone.

Water level measurements are normally taken using a water level meter (dip meter) or in the case of artesian pressure a Bourdon pressure gauge is attached to the top.

### APPLICATIONS

- Monitoring of dams, reservoirs & embankments
- Slope stability
- Groundwater levels for dewatering & drainage
- Groundwater sampling
- Permeability testing
- Contaminated soil monitoring

### FEATURES

- Economic
- Simple to install
- Simple to use
- Variable filters
- Variable Material
- Can be used for artesian pressure

# Standpipe Piezometer

## Specifications

### POROUS PLASTIC ELEMENT

Material	HDPE
Mean pore size	60 microns
Permeability	$3 \times 10^{-4}$ m/s
Porosity	35%

### POROUS CERAMIC ELEMENT

Material	Alumo Silicate
Mean pore size	60 microns
Permeability	$3 \times 10^{-4}$ m/s
Porosity	45%

### PIEZOMETER TIP

Description	Diameter mm	Length mm
Plastic porous	27	320
Plastic porous	27	1000
Drive-in galvanised	27	400
Drive-in galvanised	27	1000
Ceramic	50	200
Ceramic	50	310

### STANDPIPE

Material	PVC
Outside diameter	26.6mm
Wall thickness	2.9mm
Internal diameter	20.8mm
Thread	BSPM/BSPF
Lengths	1 & 3m

Ceramic Piezometer Tip

Drive-in Piezometer Tip

# Standpipe Piezometer

## Accessories

### TUBING & ACCESSORIES

Standpipe piezometer tubing is supplied standard with blown ends BSPM one end and BSPF the other end.

Alternative options include flush threading and sizes up to 2" which are used mainly for open standpipe piezometers.

Tubing is available in high strength PVC or galvanised steel for drive-in piezometers in 1 and 3 metre lengths.

### ACCESSORIES

Bourdon gauges

Adaptors

Caps

Dip meters

Bentonite pellets

Protective covers

Geosense Ltd, Nova House, Rougham Industrial Estate, Rougham, Bury St Edmunds, Suffolk IP30 9ND, England
